

FOR IMMEDIATE RELEASE

ATTN: Real Estate, Lifestyle and Entertainment Editors

Elite Luxury Homes takes the pain and surprises out of building a custom home with its cutting edge technology and unique service model.

Elite Luxury Homes, Scottsdale Arizona, newly released the “In Touch” program that keeps the buyer of their homes continually updated throughout the entire building process. Through weekly on-site meetings, email, or phone updates, Elite Luxury Homes updates their buyers on the weekly progress and any changes in the time frame of the home completion.

Elite Luxury Homes first step in the “In Touch” program consists of a weekly email providing the buyer with a recap of the activities and this information is also populated on the buyers own web site URL for access at any time they wish. Additionally, if there are any time changes resulting from the weekly activities, the buyer is notified then to help prepare the buyer for a changed closing/move in date.

Elite Luxury Homes second step in the “In Touch” program is to walk the buyer through each step of their home from buying the lot, architecture design, setting up financing, up through the landscaping. By assisting the buyer through all of these stages we can help the buyer make sure they are asking the right questions and truly getting the home they desire at a price they can afford.

Elite Luxury Homes takes the “In Touch” program to new heights by providing the buyer with their own URL (www.homesbyelite.com) to view updated digital pictures of the major stages of construction. “We believe by providing each buyer with their own URL we can keep the buyer excited and visually informed of their new home. Another reason we are so excited about the “In Touch” program is it helps our out of town customers reduce travel time to see their changes and lets them see the changes quickly and vividly”, says President of Elite Luxury Homes, Chris Nelson. This digital picture program also includes a picture up to 6 months after the completion of the home. This final picture can show the house completed with landscaping, furniture, drapes, etc... the way the buyer wants to capture their investment.
